## NOTICE

**To: BUILDERS AND CONSTRUCTION WASTE HAULERS IN WINTER PARK**

**SUBJ: CITY REQUIREMENTS FOR CONSTRUCTION WASTE AND DEBRIS**

The City of Winter Park entered into an exclusive franchise agreement in 2009 with Waste Pro of Florida, Inc to provide solid waste collection for residential and commercial establishments throughout the City including the collection of waste and debris from all construction projects. With the recent upswing in construction, it has been brought to our attention that waste containers, other than Waste Pro of Florida have been used on residential building sites for construction site waste removal. All contractors involved in active construction projects in the City must either utilize containers leased from Waste Pro of Florida or, at the option of the contractor, may haul their own construction debris using a container owned and hauled by the contractor. All recycling containers are exempted from the franchise agreement.

This notice is to familiarize contractors with the City's code and franchise agreement with Waste Pro of Florida. Reminders will be provided as a courtesy to projects currently underway. The City will begin to actively enforce the franchise agreement for both new and currently active construction sites, we ask that all contractors utilize Waste Pro of Florida containers for their construction waste hauling by that date or utilize the other option listed above. Currently, all commercial or multi-family construction sites should already be utilizing Waste Pro of Florida containers.

Thank you for your cooperation in this matter.

For direct information on leasing containers please contact

**Waste Pro of Florida at 407-774-0800**

and indicate that you desire to lease a container within the City of Winter Park.
