

WINTER PARK RESIDENTIAL RATES

(all rates effective with June 2005 billing)

The City of Winter Park will strive to keep your rates competitive. It is a cornerstone of our commitment to excellence, which we take very seriously. There are some factors affecting your electric bill that are beyond our control. One factor is the cost of fuel used to produce electricity.

This sample bill is for a customer who uses 1,500 kWh of electricity each month.

We have broken down the residential rate so you can clearly see the costs for the first 1,000 kWh as compared to the costs for kWh above 1,000. Also below we have defined some of the other items included in most residential bills.

- 1 **Customer Charge:** A fixed monthly amount to cover the cost of providing the service to your location. This charge is applicable whether or not electricity is used.
- 2 **Energy and Demand Charge:** All the costs, other than fuel involved in producing and distributing electricity.
- 3 **Fuel Cost Recovery Factor:** This represents the actual cost of coal, oil, uranium and natural gas that is used to generate electricity. The City of Winter Park does not make a profit on fuel. This charge is adjusted periodically to reflect changes in the cost of fuel. It is a dollar-for-dollar pass through for actual fuel costs from the wholesale power provided and is adjustable when fuel prices increase/decrease. - 4 **Gross Receipts Tax:** This 2.564% tax is collected in accordance with Florida State Statutes. It is assessed on all electric public utility companies and is paid directly to the state.
- 5 **Franchise Fee:** This is a 6% fee the City of Winter Park collects from customers to compensate the community for using the rights-of-way.
- 6 **Electric Utility Tax:** In accordance with state law, a municipality/county may levy a 10% tax on the purchase of electricity within that area. 100% of this tax is paid directly to the city. The City of Winter Park does not keep any county utility taxes.

Kilowatt Hour: Consumption is measured by the kilowatt hour (kWh). A kilowatt hour is how much energy is used by one kilowatt of electric power over an hour's time, or one thousand kilowatt's for one hour.
