***On SP8-1 Troy suggested moving the East lanes more West...

Do need turn lanes at Webster and would like turn lanes at Solana

There are no buses that go this route

Multi use path is on west side

Mini stop signs were discussed

Should leave area near OCPS at Bennett as 3lane road to take future development into consideration

Bus stop relocation at Denning & Webster – per Butch, Lynx is already stopping at Webster. Move current Denning stop and move it around the corner to Webster

Driveways along path will remain flat so as not to interrupt the flow of pedestrian traffic***

Staff went over the three a la carte items that are on the table- Connection between Denning Dr & Lee Rd., Undergrounding and Lighting, and Combining of Phase I and II.

PW staff is committing to install new LED cobra head lighting regardless of the decision on the a la carte items

At this point, Staff stated that although no action could be made, it is open for discussion.

Alex has a serious concern about undergrounding being paid by CRA. Decorative lighting would be a great touch.
