Marty Sullivan, 901 Georgia Ave, spoke to the need to make sure the increased density possible with the Orange Ave Overlay is not overlooked and the cost of full concurrency be included in the development cost.

Surtax
Mr. Attaway provided information on the latest understanding the City has on the proposed transportation surtax. Several months ago Mayor Deming’s provided his thoughts on instituting a 0.01 sales tax for the operation and maintenance for roadways, transportation, Lynx, Sun Rail etc. The tax would generate about 600 million dollars for year one. He provided details on how the monies may be divided and what Winter Park’s share may be. Discussion ensued on possible uses/projects for the money, the value of having projects identified and ways to support the surtax. The Board requested a list of “needs and desires” at the next meeting, including cost. The Board also requested undated project funding information and historic funding data.

Mr. Stephenson, Planning Director, provided an update on the Orange Ave. Overlay including proposed incentives in the development process. He will provide a draft of the report to the Board.
