Winter Park Firefighters Pension Plan Total Fund Investment Summary March 31, 2018
The investment program continues to emphasize the use of passive or index products across the
spectrum of domestic equities and fixed-income. This approach to investing among institutional
defined benefit plans continues to attract record asset flows during the past five years. Your
program has been enhanced with improved performance and reduced fees since indexed
solutions were applied. Domestic equities have entered the ninth year of positive sentiment. This
equity cycle has been extended by extremely low interest rates and positive earnings surprises.
Foreign stocks were the big winners in 2017 – following an extended period in which
performance trailed US stocks. Equities are exhibiting signs of over-valuation – as measured by
nearly all metrics. Bond valuations are under pressure – as Fed policy rates are gradually rising
and the 10-year treasury yield approaches 3.0%. With a 59% allocation to equities, of which 13%
...
is invested in international stocks and 8% is invested among convertible bonds – the overall risk profile is below peers. The upper-end allocation to international equites among peers was 18%, as of 3/31/18. • For the quarter, the Plan experienced a modest loss of $374K or -0.6% (-0.7% net) – in line with the strategic model (-0.7%).
