The City of Winter Park's periodic update of construction & improvements along Fairbanks Avenue

Construction activity to begin Sunday, September 16

Project overview

The Fairbanks Avenue Roadway & Wastewater Improvement Project includes the installation of a new gravity sewer system, the repaving of Fairbanks, and the beautification of the corridor between US Highway 17-92 and Interstate 4 (I-4).

What does the project include?

- Installation of new sewer system
- Repaving & restriping of road to add new bicycle lanes
- Replacement of two signalized intersections
- Installation of decorative street lights
- Improvements to pedestrian crosswalks

What should businesses expect?

- Most of the work on Fairbanks will take place in the evening after normal business hours.
- Two lanes of traffic eastbound and westbound are expected to be maintained during normal daytime business hours.
- If special signage is necessary, the city will make every effort to provide information to direct customers to your business.
- Maintenance of Traffic (MOT) will be done in accordance with Florida Department of Transportation (FDOT) requirements. Frequent changes to the MOT should be expected throughout the project as construction progresses.

What should residents expect?

- Residences directly behind the commercial businesses on Fairbanks may be unavoidably impacted by nighttime construction activities.
- Impact to residents from daytime force main construction activities on Cambridge Boulevard, Salisbury Road and Wymore Road, will be minimized by using special construction techniques.
- Restricted access to driveways and properties should be minimal and of short duration.
- All work will take place within existing state, county or city rights of way.

Stay informed

- Updates to the construction schedule will be posted regularly on the Fairbanks web page **cityofwinterpark.org/fairbanks**.
