Park Avenue Refresh: Stormwater Improvement Updates

From 8:30 p.m. to 7 a.m. last night and early this morning, the Park Avenue Refresh project team was working overnight to install new stormwater drains across Park Avenue and a new stormwater catch basin at Cole Avenue to provide proper drainage for the curb bump-outs at this location.

If you are in the area, you will see what was uncovered from underground, a large concrete structure and sections of concrete pipes that were removed last night and will be replaced with new pipes and a new catch basin on Thursday this week.

This storm drain work was necessary due to the change in street elevation from the newly installed bump-out. These larger paved areas at the intersections offer a safer pedestrian experience shortening the distance of the crosswalk from curb to curb and also allows for additional beautification of landscaping and potted seasonal plants.

All Park Avenue Refresh updates and information are accessible at cityofwinterpark.org/ParkAveRefresh. Please share this information with interested friends, colleagues, customers and/or guests.

If you have any questions, please email parkaverefresh@cityofwinterpark.org. Thank you for your patience as we work through the Park Avenue Refresh Project.

We're fluffing our feathers - something beautiful is coming.
