

# HURRICANE IAN

## Winter Park storm information

### ALL POWER RESTORED

Sunday, October 2, 2022 | 1 p.m.

As of 1 p.m., October 2, all Winter Park electric customers whose outages were repairable by the city's crews and have reported an outage have been restored.

If you are still experiencing an outage, please report it by contacting 1-877-811-8700.

At the height of Hurricane Ian, approximately 3,800 customers were without power. The city electric crews, along with mutual aid assistance from Jacksonville (Florida) and Michigan, worked 24-7 once the conditions were safe to restore our community's power.

We are proud of the work they have accomplished and are grateful for the light they shine on our city.
