PRESS RELEASE

Winter Park offers FREE Wi-Fi service in and around downtown

WINTER PARK, FL, an internationally recognized, award winning city with multiple accredited agencies (May 1, 2020) The City of Winter Park is proud to announce it has partnered with local business Frog to launch FREE Wi-Fi service in and around Central Park and Shady Park in the city's downtown business district. This public W-Fi service is already active in Central Park and will be fully functional in Shady Park by the end of next week. Outdoor seating/dining areas near these parks will also have accessibility to this city service funded by the city's Community Redevelopment Agency as part of its downtown enhancement program.

During this time of necessary social distancing due to the COVID-19 pandemic, residents and guests are encouraged to enjoy the outdoors along with FREE outdoor internet access while doing so. To access the new Wi-Fi service, users should look for **City of Winter Park Wi-Fi by frog** in their Wi-Fi list, or simply scan the QR code shown here, which will also be shown in the near future on temporary signage throughout the accessible areas and the city's digital kiosks.

According to Winter Park Mayor Steve Leary, "Improving our residents and guests' quality of life is very important to us. The city has been working diligently, through our Information Technology Department, to expand the city's private fiber network. We are very excited to partner with Frog, one of our local small businesses, to launch this new service to enhance our downtown business district for our residents, businesses and guests."

Michael Voll, CEO of Frog, offered, "I am thrilled to announce our partnership with the City of Winter Park. I am also grateful to call this wonderful city home to our corporate headquarters, and the place my wife and I have chosen to raise our family. This project represents more than the technological innovation it delivers. It continues the family legacy of serving this community that my wife's grandfather, Britt Simms, began in the 1950s with Cooper Simms Nelson and Mosley Insurance, and was carried on by my father-in-law, Steve Simms. During these unprecedented times, I am especially grateful to partner with the city in giving back to the community. This project will enhance the experience of the special place we call home."

Based in Winter Park, Frog is a next generation internet and technology provider focused on delivering infrastructure to support smart cities and communities of the future. With a 100% fiber optic network and residential speeds up to 10,000 Mbps, Frog delivers the fastest internet on the planet as well as residential and business solutions that make life easier.
