LAKE ALERT LIFTED

Precautionary alert for Lake Killarney lifted

WINTER PARK, FL, an internationally recognized, award winning city with multiple accredited agencies (July 25, 2022) The precautionary alert that was issued by the City of Winter Park in partnership with Orange County has been lifted. Lake samples collected on July 21 showed elevated levels for the east side of the lake, however, it does not surpass surface water criteria. Central and west samples had no detection. Lake Killarney is now safe for recreation, irrigation and fishing.

This data demonstrates the spill was mostly contained by the stormwater exfiltration system in place limiting impacts to Lake Killarney. For more information, please contact Lakes Division Manager Joey Cordell at jcordell@cityofwinterpark.org or 407-691-7829.
