PRESS RELEASE

City encourages water conservation through this weekend

WINTER PARK, FL (November 19, 2026) Due to the amount of rainfall the region is experiencing, city staff are actively monitoring lift stations and lake levels, attending to minor localized street flooding, and ensuring storm drains remain clear. Currently, all streets in Winter Park are clear and traversable. Due to oversaturation of the grounds, both golf courses, the Winter Park Golf Course (WP9) and Winter Park Pines Golf Club (WP18), are currently closed.

This amount of rainfall does place additional stress on the city's sanitary sewer system. As a result, the City of Winter Park Water & Wastewater Utilities Department is asking residents to minimize indoor water use the following ways:

- Limit the amount of toilet flushing.
- Abstain from running dishwashers and clothes washers.
- Limit the amount of water used during a shower.

Please report any sanitary sewer related issues to 407-599-3219. Thank you for your cooperation.
