

We're excited to announce that the Foundry project will commence on March 18th. We want to inform the neighboring businesses about the ongoing construction at 250 S Park Ave, which may result in temporary road and sidewalk closures. Our plan is to have the crane on-site first thing Monday morning, March 18th, at 7 am to kick off the project. Following the initial visit, the crane will return every Friday to handle the offloading of trash and materials. Thank you for your understanding and cooperation as we are working on this project.

#### Crane Arrival and Setup:

- The crane is scheduled to arrive at 7 am on the project commencement day, tentatively set for March 18th.
  - Loading of materials will take place from the designated area in the parking lot.
- The crane will be on-site for a maximum of 4 hours to facilitate the loading of necessary materials and the offloading of debris.

#### Weekly Crane Schedule:

- The crane will return every Friday at 7 am for a maximum of 4 hours.
- This schedule is expected to continue for approximately 6-8 weeks, though it may be subject to changes due to weather conditions.

#### Project Contacts:

- Superintendent: Jose Colon, 352-801-3884
- Production Manager: Jeremiah Bezio, 423-748-3424
- Project Manager: Christopher Martin, 772-494-8178
